

TITLE OF ACTIVITY	<i>Nevada Health Care Forum</i>
ACTIVITY DATE	<i>Tuesday, October 11, 2011</i>
PRESENTER'S NAME	

CONFLICT OF INTEREST POLICY

It is the policy of Touro University Nevada to ensure balance, independence, objectivity, and scientific rigor in all its educational activities. Faculty members are expected to present information in a scientific and objective manner. Any real or apparent conflict of interest related to the content of the continuing education activity must be disclosed and resolved prior to the faculty member's presentation. Conflicts of interest occur when the presenter has affiliations with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the presentation topic. Employees of these companies are prohibited from presenting at Touro University Nevada sponsored educational activities.

Check one of the following boxes. If you have an affiliation with one or more pharmaceutical companies, medical device manufacturers, or other commercial interests, indicate the names of the organizations for the Affiliation/Financial Interest categories listed below:

I have no affiliations with commercial interests that produce healthcare products or services related to the content of my presentation.

I have a financial interest/arrangement or affiliation with the following organization(s) that could be perceived as a real or apparent conflict of interest in the context of the subject of this presentation.

<u>Affiliation/Financial Interest</u>	<u>Name of Affiliated Organization</u>
Grant/Research Support	_____
Consultant	_____
Speakers' Bureau	_____
Major Stock Shareholder	_____
Other Financial or Material Support	<u>I am an employee of URAC a non profit accrediting body</u>

PRESENTER AGREEMENT TO ADHERE TO CONFLICTS OF INTEREST POLICY

In order to resolve conflicts of interest that can arise during the course of my presentation, I agree that:

- I am not an employee of any of the companies identified above or of a company related to the topic presented.
- Scientific research referred to, reported, or used by me conforms to the generally accepted standards of experimental design, data collection, and analysis.
- The content is based on scientific evidence that is accepted within the profession of medicine.
- My recommendations are known to be effective in the treatment of patients and have benefits that outweigh the risks.
- I am presenting information without bias or favoritism towards any pharmaceutical company, medical device manufacturer, or other commercial interest.

Christine J. Hayden, RN, MSN
